**Security Recommendations:** In this section, provide recommendations, related to controls and/or compliance needs, that your IT manager could communicate to stakeholders to reduce risks to assets and improve Botium Toys' security posture.

- Data encryption is imperative to ensure PII/SPII data is secure while being transmitted and stored, as well as to be compliant with current frameworks.
- Managerially, implementing the controls of least privilege and separation of duties is essential to reducing risk to assets.
- Disaster recovery plans and proper data backups are necessary to ensure business continuity in the event of an attack.
- Updated password policies as well as a password management system are needed to improve security posture and reduce risk of brute-force attacks or breaches.
- An intrusion detection system should be implemented to help monitor activity and detect suspicious events.
